### QUOTE(S) OF THE WEEK

“Every single thing in the world that was made by anyone started with an idea. So to catch one that is powerful enough to fall in love with, it is one of the most beautiful experiences. It’s like being jolted with electricity and knowledge at the same time.” – David Lynch

“Defeat may serve as well as victory to shake the soul and let the glory out.” – Edwin Markham

“Perhaps you and I were born too late to explore the world and too early in history to explore the stars, but we were born at just the right time, which is pretty much all times ever — to explore language — to explore what can be said. What should be said? What should we send out to space? What, that can be said, will you be the first to say?” – Michael Stevens

“True originality consists not in a new manner but in a new vision.” – Edith Wharton

“If you don’t want to be replaced by a machine, don’t try to act like one!” – Arno Allan Penzias

“If I have been able to see further, it was only because I stood on the shoulders of giants.” – Isaac Newton

“The function of science fiction is not always to predict the future but sometimes to prevent it.” – Frank Herbert

“Give me a place to stand, and I shall move the world.” – Archimedes

The **National Creativity Network** believes that by fostering creativity in our society as a whole, and specifically with future generations, America can remain a leader in innovation and free enterprise. The very future of our communities and institutions depends on our ability to nurture and harness imagination to creatively solve problems. If creativity is to be nurtured, systems, institutions and networks must be transformed.

The opportunities that emerge to transform our nation are largely dependent upon the degree to which we are connected to each other. Our connection will become a catalyst:

- to enhance the flow of relevant information,
- and to improve the ease with which key nodes of creativity, be they in the domains of Education, Commerce, Culture or across disciplines, can gain access to the best thinking, best questions, and most successful practices as well as other resources their ventures may require.

Our strategy is to engage thought leaders across North America to create a powerful network for transformation.
